

APOLLOTM Automation

Solely for public libraries

Delight staff and patrons alike with the Apollo ILS/LSP. It's solely for public libraries with fewer than 300,000 holdings. And it's all in the Cloud with full Library Services Platform (LSP) advantages, so you get fast integrations, features, and upgrades with no technical effort needed.

Try it, free, with your data. You can see what you get before you commit to or pay anything.

We have no school customers.
You come first, period.

Killer Features

- Reserve Express™: author subscription wizard
- Gabby, 2-way texting with “renew” commands and more
- VersaCat® and VersaCard® consortial borrowing
- Item deletion preserves circ data and responsible patron
- e-book/e-audio access integrated into the catalog
- Staff option to allow patrons to keep and view circulation history
- “Related Cards” to associate families
- Top rated support

- "You checked out this item on [date]..."
- Accelerated Reader™ data and Lexile® measures added automatically; searchable
- Customization with CSS and widgets for your website
- Host the public catalog on your own domain
- On-line payment of fines/lost books; no merchant account req'd

Circulation Management

- Off-line Checkout with full patron and item information, using the normal Checkout screen
- Automatically print identifying wrapper when an item on reserve is checked-in; with auto email or text notification
- Volunteer Enabling: providing accuracy and preventing mistakes
- Pre-due date auto-email/SMS-text notifications
- Easy to use overdue notification stages with auto email/text messages and customizable letters
- Related Cards; account changes easily propagated to others
- Backdate and Bulk check-in
- Use date of birth to automatically change patron type
- Free texts/emails with detailed notification status information
- Reprint any past payment receipt

Collection Management

- Accurate, rapid cataloging with Authority Control and Integrated MARC import
- Creates authority records from your imported data
- Restore deleted items
- Item deletion preserves circ data and responsible patron
- Batch Weed/Delete and Batch Edit
- "Hot" Inventorying; conducted with the library open
- Print barcode and spine labels

Other

- Self-checkout with only a PC and a scanner
- Patron Self Sign-up
- Email newsletter subscription management
- User forum for staff
- On-line help, FAQs, and free training
- Reporting: Dozens of reports with broad flexibility and export

Servers

- Apollo is a Cloud/hosted service using multi-tenant architecture. This means that you get fast updates and service, as well as hassle-free 3rd party integrations. Servers are not shared; they are managed solely by Biblionix.
- Security:
 - all pages are encrypted/https
 - all of your data is stored encrypted in the database
 - all SIP connections are encrypted
- There is NO single point of failure. Servers reside in top-tier Internet datacenters with Geographic Redundancy: your data is always valid on more than one server, in more than one city, with more than one hosting service.
 - Redundant connections to multiple Internet backbones
 - Staff, equipment, and software to protect against hackers
 - 24/7 Technical support with on-site spare hardware
 - Redundant, solid state disk drives
 - Backups every 1/2 hour to even different cities
- "LDIF" for exporting library data in MARC and XML for backup and easy migration. It's your data. You can have it free, anytime

Hardware/Software Requirements

- No server is required and there's no application to install
- Browser: Patrons: any browser Staff: Firefox (currently)
- A high-speed (DSL, cable, or better) Internet connection for the library
- Reasonably modern hardware, on which typical Web browsing is acceptable

Options

- Content Café2® from Baker & Taylor for catalog enhancement
- Auto-Calling for overdue and reserve calls; no setup fee or equipment req'd
- Branch Support, with floating collection option
- Kids Catalog
- Acquisitions module for managing your budgets and buying processes
- "Gabbie" two-way texting and auto-commands, like 'renew all'
